

Do you have twins or know a twin family?

Are you interested in knowing why some twins are more alike than others?

We would love for you to be a part of our **Twin Registry!**

What is a Twin Registry?

A Twin Registry is a list of families of twins or other multiples who are interested in being contacted about our research studies. If we have a study we think you might like to be part of, we will contact you and you can decide if you would like to do it.

Our research

Most of our studies focus on why some children struggle in math and reading, and others don't. Our research is fun for kids, and we come to your home at a time that works for you. Best of all, we share what we find with our families, and *our studies pay you for your time!*

Who are we looking for?

We are always searching for families of twins or other multiples! Siblings will also have a chance to participate.

All you have to do is contact us by email or phone, and we will do the rest!

Not a family of multiples but interested in research? Contact us anyway! We have additional research opportunities you may be interested in. Also, please share this announcement with any twin families you know!
